### **DETAILED ACTION**

This application is in condition for allowance except for the following formal matters:

In the specification, reference numeral 84 is shown in Figure 7 but not referenced in the specification; it should be included in paragraph [0077]. Also, reference numeral 108 is shown in Figure 8 but not referenced in the specification; it should be included in paragraph [0078].

In claims 36, 50, 87, and 88, the phrase "a critical angles" appears to be grammatically incorrect, it is suggested to remove the "a". In addition, applicant may wish to make the same change with the phrase "a cortical and a trabecular portions".

In claim 42, the use of the word "simultaneously" twice within three words is awkward. It is suggested to remove the first occurrence of the word.

In claims 46 and 58, the phrase "positioning of device" appears to be grammatically incorrect.

In claim 53, the term "receiving ultrasound apparatuses" should be changed to "receivers" as is consistent with similar claim 41. The use of the term "ultrasound apparatuses" appears to intend to include the entire system including the processor for example.

In claim 54, the word "display" should be "displays".

In claim 56, "the at least two receivers" lack antecedent basis.

In claim 59, the claim appears to be grammatically incorrect, and a run-on sentence. It is suggested to insert the word "which" before "detects".

Also in claim 59, "the latex membrane enclosing ultrasound conductive material" lacks antecedent basis. This can be fixed by changing the word "conductive" to "conductive" as used in previous claims.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
